EDUCATION MENU

Education Packages

LiDCO are able to provide thorough education packages that are available for new product installs and ongoing education and support. Our Clinical Specialists and Sales team will work with you to create bespoke education plans that reflect the needs of your clinical environment. Our Clinical Specialists can also assist with the development and implementation of protocols on your unit, for example protocols please contact LiDCO on 020 749 1500.

LiDCOplus / LiDCOunity

- Level 1 Training - basic understanding and set up of the monitor, including navigation of the different screens and discussions around clinical applications of the LiDCOplus, LiDCOrapid and LiDCOunity systems.
- Level 2 Training - recap on Level 1 session with A&P revision and principles of pressure, flow and resistance. Demonstration and understanding of the LiDCOplus calibration.
- Level 3 Training - recap on Level 1 & 2 training sessions, A&P presentation, background, understanding and application of the LiDCO technology including troubleshooting and an overview of the evidence.
- RCN accredited study day - a full day teaching session (accredited by the RCN). Pre and post course reading materials are supplied, and the study day counts for 13 hours towards CPD. The day includes presentations on patient physiology, patient optimisation, the technology, trouble shooting and a calibration demonstration. Clinical scenarios, workshops and competencies form the practical element of the day.
- RCoA accredited Goal Directed Therapy Masterclass - held throughout the year (by invitation only).
- Unit based training - our Clinical Specialist are available to provide support and assistance for staff undertaking patient calibrations.
- Ad hoc training - providing refresher training to maintain competencies.
- Bespoke presentations/training sessions - can be provided for audit/study days.
- Trouble shooting - our Clinical Specialists are available for any questions or queries you may have.

LiDCOrapid

- Level 1 Training - Basic set up of monitor, functions and clinical applications.
- Level 2 Training - Recap on Level 1 training with A&P revision and review of the evidence.
- Audit Day Training - our Clinical Specialist are able to attend lunch meetings/audit days and provide tailored training, product demonstrations and presentations.
- RCN Accredited Study Session - coming soon. This will include product demonstrations, presentations on patient optimisation, the LiDCO technology, applications of use and a review of the latest evidence.
- Ad-hoc Refresher Training for all levels of staff.
- Theatre cases - Our clinical specialist are available to support the use of the LiDCO technology on patient.
